

Business Background

The history of Bennie Equipment dates back to 1967, at the establishment of 'Midland Fork Lifts Ltd'. In our over 50 years of equipment experience we have continued to expand our material handling capabilities to hire a fleet of some c.500 machines. Bennie Equipment as we know it today was formed from the merge of Midland Fork Lifts Ltd with Paramount Fork Trucks Ltd in 2017. We are a complete equipment solutions provider offering material handling equipment for sale, contract hire, and short-term rental across the UK. We ensure to provide an unbeatable full-service equipment solution to our customers.

In 2018, only a year after the merge, Bennie Equipment became the official UK distributor of Terberg Kinglifter Truck-Mounted Forklifts. Terberg have a rich, 150-year history in providing equipment in specialist vehicle markets. Terberg Kinglifter, established in 2008, have built-up a reputation for customer focus and quality, based on supplying truck-mounted forklifts of the highest quality and offering excellent performance. These machines are also renowned for their power to weight ratio, high-quality components, and outstanding build quality. Kinglifters use a modular system; standard models with many options means that there is a Kinglifter to be perfectly tailored to suit any application.

We are very proud of our history at Bennie Equipment and believe that enhancing our core equipment offering is the next exciting step for our brand.
