

## The all- new E-TKL, the fully electric truck mounted forklift from Terberg Kinglifter

**The all-new Kinglifter E-TKL brings you the versatility and efficiency of the TKL with all the benefits of being an electric forklift.**

The E-TKL is perfect for inner city and green zone deliveries thanks to it being a zero emissions machine with its 16.6kWh Lithium battery. It also helps to maximise your work productivity thanks to its high-power rating of 25kW. The concerns about the batter life are taken care of on this electric forklift with its sizeable 16.6 kWh batter, which allows 3.5 hours of work before needing to be recharged.

Terberg has devoted particular attention to optimum anti-corrosion protection, to ensure that their truck mounted forklifts are built to last and that it is important for your company's image that a truck-mounted forklift retains its good looks.

The frame, the lifting mast, and other steel sections are finished with a CDP base layer and powder coating. The body panels are made of stainless steel. The legs, which are always susceptible to damage in use, are hot-dip galvanised. The legs of the 4-way machines are finished with a CDP base layer and powder coating.

The E-TKL is suitable for a variety of applications including logistics, building materials, recycling, gas cylinders, beverage and agriculture and turf. All models are fitted with work lights, rotating beacon, parking brake, power steering, and 180° steering angle.
